Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Postman
Type of Testing	Load Testing
Target Module / API	Conversation Starter Generation API
Test Environment	Local
Test Date	05 July 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Generate conversation starters	1	30	Response generated successfully
2	Verify fact-check API	1	30	Verification completed successfully
3	Submit user profile	1	20	Profile accepted without errors

4	Multiple API requests	1	60	Stable performance without failures
---	-----------------------	---	----	-------------------------------------

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.4 sec	Pass	Within target
2	Response Time (Max)	< 5 seconds	3.2 sec	Pass	Acceptable
3	Throughput (Req/sec)	N/A (single -user local app)	15 req/sec	Pass	Stable
4	Error Rate	< 1%	0%	Pass	No errors
5	CPU Utilization	< 80%	55%	Pass	Normal
6	Memory Utilization	< 80%	62%	Pass	Normal

Step 4: Observations & Analysis

Key Findings:

The application responded quickly and handled all test requests successfully.

Bottlenecks Identified:

No major performance bottlenecks were observed.

Optimization Steps Taken:

Optimized API processing and maintained efficient resource usage.
