Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No

9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes (Linked in Project demonstration folder)

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA
Login Credentials (Demo)	NA
Platform / Hosting Provider	NA (Project executed locally)
Repository Link	https://github.com/mudevamshinaik07/Personalized-Networking-Assistant

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites :

- Windows 10/11
- Python 3.11+
- Git
- Visual Studio Code
- Required Python packages from requirements.txt

Step 1:

Clone the repository.

Step 2:

Open the project folder in Visual Studio Code.

Step 3:

Create and activate the Python virtual environment.

Step 4:

Install the required dependencies using:

```
pip install -r requirements.txt
```

Step 5:

Run the FastAPI application:

```
uvicorn app.main:app --reload
```

Step 6:

Open the browser and access:

```
http://127.0.0.1:8000/docs
```

Step 7:

(Optional)

Run the Streamlit frontend if required.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Project is not deployed online.	Runs successfully on the local system.
2	Internet connection is required for AI model/API features.	Ensure an active internet connection before running the application.
3	AI-generated conversation suggestions may vary depending on the input provided by the user.	Users can modify the event description or interests to obtain more relevant suggestions.
